Topcon for Human Life

Expand our businesses and solve the societal challenges within the growing market of healthcare, agriculture and infrastructure.

Topcon embraces the philosophy of Topcon for Human Life. We will accelerate our growth strategies based on the vision of expanding our businesses and solving the societal challenges within the growing markets of healthcare, agriculture and infrastructure. In healthcare, we will address the increase in eye disease resulting from global population aging by working to enhance IoT medical network solutions to improve early detection of diseases and increasing medical efficiency. In agriculture, we will address food shortages resulting from global population growth by enhancing our IT agriculture solutions to improve productivity and quality. For infrastructure, we will enhance IT construction solutions to respond to engineering labor shortages caused by increasing global infrastructure demand.

Satoshi Hirano
President & CEO
Topcon Corporation

Contributing societal challenges

Increase in eye disease resulting from global population aging

Food shortages resulting from global population growth

Global infrastructure demand in order to solve labor shortages at construction sites

IoT Medical Network Solution

- Physical check up
- Prognostic management
- Early detection of diseases
- Medical efficiency improvement

IT Agriculture Solution (automation of farming)

- High-precision Labor saving
- Production / Quality improvement

IT Construction Solution (automation of construction work)

- Experts unrequired High-precision
- Solution to labor shortage

Topcon's solution for the existing societal challenges
