The TOPCON GROUP believes that practicing Management Philosophy, Management Policy and Business Conduct Guidelines globally is to promote CSR Activities.

Management Philosophy
TOPCON will widely contribute to the human society through corporate activities.

Management Policy
1. TOPCON will recognize that coping with environmental problem is an essential corporate activity for the society of human beings to harmonize and cooperate with earth and will strive to cope with it spontaneously and actively.
2. TOPCON will develop and provide the Products and the services helpful to the society considering their safety and perform the quality control with full preparations.
3. TOPCON will set its ideas at the formation of fair, transparent and free competitive society, and will hold sound relationship with politics and administration.
4. TOPCON will positively confront the anti-social powers and groups that threaten the public order and safety of civil society, and will have no relationship with them.
5. TOPCON will have communication widely with the society and disclose the correct corporate information appropriately.
6. TOPCON will realize the affluent life of Employees, secure the safe and worker-friendly workplace environment and respect the character and personality of each Employee.
7. TOPCON will respect, in its overseas business activities, the culture and customs of the country and perform the activities to contribute the development of the country.
8. TOPCON will take appropriate preventive measures for and cope with all risks involved in business conduct and strive to prevent the loss of management resources.
9. Top executives of TOPCON will recognize that the realization of the fundamentals of business conduct guidelines is the role of their own, take leadership, promulgate the guidelines to the relevant persons, establish in-house system and cultivate the sense of ethics.

Business Conduct Guidelines
TOPCON will secure the profit through fair competition in order to reward the employees, the stockholders and the society and pursue to be a useful existence as a “good corporate citizen”. For these purposes, TOPCON will establish hereby the following business conduct guidelines, and will observe all domestic and foreign laws, international rules and their fundamental principles and make sound social judgment in accordance with such guidelines.

Business Conduct Guidelines: Establishment in 1990, the third revision in 2007

Company Overview
Corporate name: TOPCON CORPORATION
Location of the head office: 75-1, Hasunuma-cho, Itabashi-ku, Tokyo
Established: September 1, 1932
Capital: 10,297 million yen (as of March 31, 2009)
Representative: Takashi Yokokura, President
Sales: Consolidated: 112,666 billion yen (Fiscal year ended March 2009)
Workforce: Consolidated: 4,964 employees (as of March 31, 2009)
Business: Positioning Business (dealing with Surveying equipment)
Eye Care business (dealing with medical equipment)
Finetech business (dealing with industrial equipment and optical devices)

Group Companies:
Domestic: 14 companies
Overseas: 44 companies
Major international CSR-related charters TOPCON supports: United Nations Global Compact (participated in October 2007)

Practicing Its Management Philosophy
I believe that practicing our management philosophy, “TOPCON will widely contribute to the human society through corporate activities.,” and aiming to become a group in which employees are proud, and that enjoys the confidence of the society is the management to fulfill our social responsibility.
We have our predecessors’ thought incorporated in the Management Philosophy as a starting point, to have a clear vision for the future. In any kind of business situation, we will promote CSR Management. Especially, a viewpoint from consideration of the global environment, we have a common slogan “Hand down the Irreplaceable Global Environment to the next generation in a sound status.” With this in mind, we will realize resource and energy savings by developing environmentally-conscious and environment-contributing products.

Raising Consciousness of Compliance and Risk
The TOPCON GROUP is global that approximately half of the employees of the group are working outside of Japan and sales of overseas are more than 74%. In each country and area, legislations, social norms, history and culture of its society are different and employees’ senses of values are various.
Therefore, in order to promote CSR management all together as a group, it is important for everyone to share the basic sense of values and in October 2008, we issued Basic Policy for CSR. Furthermore, we ask our employees to polish their minds, that is, an understanding of diversity, flexible and refined sensibilities.

Respecting the spirit of the United Nations Global Compact
The TOPCON GROUP participated in the United Nations Global Compact in October 2007 as we believe that the Ten Principles presented by the Global Compact should be embraced in our strategies, culture and daily works to have a guideline for better management activities. As the sense of values of the TOPCON GROUP, TOPCON reflected it to Basic Policy for CSR and the TOPCON Code of Business Conduct and laid the foundations to achieve responsible corporate activities for our stakeholders.

The TOPCON GROUP will promote CSR activities through corporate activities and is ready to fulfill its responsibility and raison d’etre as a corporate group and come up to your expectations. We would like you to provide us with your support and cooperation.

TOPCON CORPORATION
President

Message from Top Management
Basic Policy for CSR

1. TOPCON will locate CSR activities in the center of business and work on it intentionally in order to build, share and implement the sense of values and standards suitable for global enterprise.

2. TOPCON will, to the extent of our influence, support and implement the rules and regulations that are globally approved regarding Human Rights, Labor Standards, Environment and/or Anti-Corruption as declared in THE GLOBAL COMPACT.

3. TOPCON will make a social contribution voluntarily and actively through developments, production, sales and services of useful products.

4. TOPCON will promote an environmental management through the creation of environmentally-conscious business process and through providing with environmentally-conscious products and services.

5. TOPCON will strive to establish CSR activities in every officer and employee’s daily work and to infiltrate and establish them within global TOPCON GROUP companies.

6. TOPCON will acquire understanding and confidence of all the stakeholders of TOPCON GROUP companies by providing with information actively.

Relationship between stakeholders and the TOPCON GROUP

The TOPCON GROUP will observe foreign and domestic laws and regulations, respect the social ethics, contribute toward protecting the environment and provide safe and high-quality products. At the same time, the TOPCON GROUP attaches great importance to communications with its stakeholders and makes a social contribution through its business activities.

Structure of Promoting CSR

TOPCON’S CSR activities are conducted following the policy decided by “TOPCON CSR Committee”, and developed within global TOPCON GROUP companies through linkage with CSR-related divisions and other committees.

Linkage between the CSR Committee and Other Committees

- President
- Chairman of TOPCON CSR Committee (Executive Officers in charge of CSR)
- Secretariat: (Div. in charge of CSR)
- Committee members (Heads of each division)

Company’s Committees

- Risk Compliance committee
- BCP committee
- Information Security committee
- Export Control programs
- Global Environment Conference
- Environmental Practices committee
- Corporate social responsibility committee
- Customer satisfaction
- Consumer satisfaction
- Human rights and employee satisfaction
- Employment of persons with disabilities
- Gender equal society
- Safety and health committee
- Welfare committee
 Participating in the United Nations Global Compact

TOPCON participates in the United Nations Global Compact (GC) while joins GCJN which is a network of participating parties to GC. As a member of case study section meeting, TOPCON collects and uses information useful for our CSR promotion.

The Ten Principles

Human Rights
- Principle 1: Businesses should support and respect the protection of internationally proclaimed human rights.
- Principle 2: Businesses should make sure they are not complicit in human rights abuses.

Labour Standards
- Principle 3: Businesses should uphold the freedom of association and the effective recognition of the right to collective bargaining.
- Principle 4: Businesses should uphold the elimination of all forms of forced and compulsory labour.
- Principle 5: Businesses should uphold the effective abolition of child labour.
- Principle 6: Businesses should uphold the effective abolition of discrimination in respect of employment and occupation.

Environment
- Principle 7: Businesses should support a precautionary approach to environmental challenges.
- Principle 8: Businesses should undertake initiatives to promote greater environmental responsibility.
- Principle 9: Businesses should encourage the development and diffusion of environmentally friendly technologies.

Anti-Corruption
- Principle 10: Businesses should work against corruption in all its forms, including extortion and bribery.

Corporate Governance Structure

"Corporate governance" in TOPCON means the acts of Board of Directors, which the director as a stockholder’s representative constitutes, that decide a basic policy of the management, laws and statutes, others, matters of weight related to management, and also means the acts of the executives that supervise the execution of duties that use financial resources. That means the mechanism that makes the company exert the maximum power which it originally has, while keeping a system and the order of the company. Thereby, we will pursue the permanent increase of a corporate value, and the soundness and transparency of the management.

Meeting Frequency of the Boards of Directors and Executive Officers

<table>

The United Nations Global Compact

The Global Compact was first announced by the then United Nations Secretary-General Kofi Annan in an address to The World Economic Forum held in Davos, Switzerland in January 1999 and was officially launched at the United Nations Headquarters in New York in July, 2000. The GC asks companies all around the world to embrace, support and enact the ten principles universally established in regard to human rights, labor standards, the environment and anti-corruption fields.

http://www.unglobalcompact.org/ (United Nations Global Compact)
## Risk-Compliance

### Concept of Risk-Compliance

As the first item of law and regulation observation, TOPCON GROUP has its own “Business Conduct Guidelines” and “Code of Conduct” which should be observed by all of the officers and employees. For risk management, TOPCON GROUP has established “Basic Rules for Risk-Compliance”, Chief Risk-Compliance Management Officer and “In-house Information Reporting System”. The result is a system capable of appropriately and individually dealing with all possible risks arising from TOPCON and its subsidiary companies on a timely basis.

### In-house Information Reporting System, Protection of Information Providers

The standard concerning In-house Information Reporting System, Protection of Information Providers is as follows.

1. TOPCON will establish and appropriately operate the in-house information reporting system to ensure that the Employees etc. may report the risk-compliance information (i.e. any information regarding prohibited actions or other actions that are suspected of prohibited actions, under the Code) to the Chief Risk-Compliance Management Officer (CRO or Presidents at subsidiary companies) or the division in charge of risk-compliance matters directly.

2. Employees etc. who have encountered the risk-compliance information will report such information to their superiors or will provide such information in accordance with the in-house information reporting system.

3. The Chief Risk-Compliance Management Officer (CRO or Presidents at subsidiary companies), the division in charge of risk-compliance matters and/or superiors who receive the risk-compliance information from the Employees etc. will respond and act immediately and appropriately.

4. No disadvantageous treatment will be taken against the Employees etc. who provide with the risk-compliance information for good reason and in good faith, on ground of providing with the risk-compliance information.
**Risk-Compliance**

**Risk-Compliance committee**

This committee is assigned the task of discussion/drafting of basic strategy related to Risk-Compliance and basic plan, organization of management system, implementation of measures for maintenance, raising the atmosphere of organization that respects the compliance. In fiscal 2008, the committee worked on framing BCP (Business Continuity Plan) and raising the atmosphere that respects the Risk-Compliance as main tasks.

**Personal Data Protection and Information Security**

The TOPCON GROUP maintains “Basic Rules for Personal Information Protection” about the protection of personal data, and “Basic Rules for Information Security” about classified information, and is aiming at employees’ understanding of the policy and the content. In addition to protecting data, information itself, these efforts enable timely, appropriate handling of any risk regarding the information.

**Risk-Compliance training for managers**

TOPCON has implemented various trainings to create the atmosphere that respects the Risk-Compliance. In fiscal 2008, we implemented the trainings of Corporate Governance, CSR, Risk-Compliance system as main theme for all the managers in headquarters.

**Establishment of BCP (Business Continuity Plan)**

If a pandemic of new influenza or a big earthquake occurred, inadequate measures could lead to a long-term shutdown of business activities. That would seriously affect customers, neighbors and each stakeholder. In accordance with BCP basic policy as followings, TOPCON is formulating a plan with business continuity in mind.

**BCP Basic Policy**

1. TOPCON will give priority to safety and relief of employees and their families.
2. TOPCON will fulfill the responsibility for supply of the goods to customers.
3. TOPCON will support the instauration and the restoration of the region and customers.
4. TOPCON will aim at an early restoration of business and minimize the adverse effects on management.

**Information Security Policy**

1. TOPCON will recognize the property value of information, respect the information of others and endeavor to prevent the unauthorized disclosure and inappropriate use of corporate information and to protect the property right of corporate information.
2. TOPCON will protect the personal information appropriately in its business activities.
Export control

TOPCON will take no part in any transaction that may undermine the maintenance of international peace and safety. For this purpose, TOPCON will understand sufficiently the aim of the laws and regulations relevant to export control of Japan and other countries where TOPCON carries out its business activities and the “Export Administration Act” of U.S.A. and its relevant regulations, and will establish and observe the “Export Control Program” and “Export Management and Compliance Program for U.S. Products and Technologies” (hereafter these programs are referred to as “the Control Program”), for the compliance with the said laws and regulations.

Code of Conduct regarding Export Control

1. Employees etc. will not make any business transaction of export and/or import of the restricted materials in violation of the export control law of Japan or of other countries where TOPCON carries out its business activities and its related laws and regulations.

2. Employees etc. will not export and/or re-export of the U.S. products and technologies in violation of Export Administration Act of U.S.A. and its related laws and regulations.

Education regarding Export Control and the result of audit on group companies

- Education of Export Control
  In fiscal 2008, we had 26 education courses including introduction for new employees and export control seminars.

- Audit on group companies
  In order to confirm the situation of establishment of export control systems, regulations in manuals and examinations on slips, and maintenance of evidence, we had the audit on 7 companies at home and abroad in fiscal 2008.

Total Quality Assurance

Basic Policy

1. TOPCON will observe the relevant laws and regulations in accordance with TOPCON’s management philosophy to contribute to the human society, devote itself to “Customer Orientation” and “Quality First” and provide with safe and high quality Products and services that satisfy customers.

2. TOPCON will make best efforts to ensure that the Products and services have the usefulness and safety that they should provide ordinarily and are provided to customers without defect in accordance with the laws and regulations and contracts. TOPCON will also make persistent effort and pay maximum attention to prevent Product Liability (PL) accident and Contract Liability (CL) accident from arising.

Providing high-quality, safe products and services

- Observing laws and regulations
- ISO9001 ISO13485
- “Customer-Oriented” and “Quality First”

System for total quality assurance

- Customer satisfaction
- Product safety

Social contribution through corporate activities

- JAB Certificate
- UKAS Certificate
  Certificates that recognize compliance with ISO 9001: 2000, an international standard for quality management systems

http://www.topcon.co.jp/eng/corporate/quality.html
  (Quality Assurance Activities)
TOPCON, not only producing environmentally-conscious products (energy saving, miniaturization), but has technologies and products that are a clue to the settlement of various problems in near future, that is, the coming of an aging society and depletion of resources, and contribute to create a sustainable society. We are introducing herewith the technologies and products of each business unit selected from that point of view.

**Products from the Positioning Business Unit**

- **Mobile Measurement Technology relating to Energy Saving/Resource Saving “Mobile Mapping System IP-S2”**
  Mobile measurement is an innovative technology that has been getting increased attention in Japan and Western countries. Driving a car with Mobile Mapping System (IP-S2), a unified instrument of our GNSS receiver* and inertial measuring unit, can provide myriad data.
  - 360-degree panoramic image
  - Positional information from GNSS
  - Steering wheel and traction information
  - Laser scanning information
  Integrating and processing these data will create a form of the driving path in three dimensions. Utilizing the data in map-making and city planning will enable a drastic reduction of the pieces of equipment and man hours previously required.

  * An instrument that receives radio signals from the positioning satellites to determine its location.

- **Three-dimensional dots group including positional information**

**Autonomous vehicles**

The use of unmanned (autonomous) vehicles is possible by combining an automatic control system with three-dimensional route data, positioning information from GNSS satellite signals, and obstacle information detected by laser scanner. This emerging technology will take an important role in various scenarios, including realization of the movement to intelligent transportation systems (ITS)*, and travel into hazardous areas (natural disasters or polluted areas) where danger to human is apparent.

* Intelligent Transport Systems. This is a new traffic system that connects people, roads and the vehicles by information network. One major purpose of the development is to minimize road traffic problems, such as traffic accidents and traffic jams.

**For Sustainable Society**

**Products from the Eye Care Business Unit**

- **Dealing with Aging and Quality of Vision “Wave Front Analyzer KR-1W”**

As a method of the refraction correction for near-sightedness, far-sightedness and astigmatism, in addition to the glasses and the contact lens, there is LASIK surgery (a kind of the refractive surgery).
Moreover, as the extension of life by the progress of medical technology, the cataract surgery (intraocular lens insertion) which is increasing among elderly people requires not only the recovery of transparency but Quality of Vision.
By the measurement function of the Wave Front aberration that can contribute to the refractive surgery such as near-sightedness correction and the improvement of the Quality of Vision after the cataract surgery, and that attracts attention as new measurement/analysis of optical system of the glasses and a synthetic valuation method, this instrument contributes to provide with higher Quality of Vision.
LED (Light Emitting Diode) attracts attention as a long-life and energy saving illumination comparing to conventional fluorescent lamp because it converts electric energy directly and effectively into light energy. For example, the accelerative spread of illumination using LED is raised as one of the concrete measures for target achievement of the “Kyoto Protocol accomplishment plan” by the Japanese Government.

Moreover, LCD television with LED as a backlight instead of a fluorescent tube attracts attention as energy saving and eco-friendly goods. By offering inspection and measurement equipment which is crucial for LED development and manufacturing process, TOPCON will play a significant part in the LED spread, and contribute to the global warming prevention by CO2 reduction.

Solar power, one of the most promising renewable energy source is rapidly spreading worldwide as a key solution of the global warming. TOPCON has started OEM sales for solar cell evaluation equipment of SOMA OPTICS,LTD. In the field of solar cell where a big effect of CO2 reduction is expected in the future, we will offer new products by joint developments by mutually supplementing Topcon’s technology in Optics and that of SOMA OPTICS, LTD. in solar cell evaluation.

SR-UL2 I am engaged in is the world top class optical characteristic evaluation standard equipment with highest sensitivity 0.0005cd/m² corresponding to the evaluation of mega contrast FPD *, and wide dynamic range of measurement luminance range 0.0005 ～ 300,000cd/m². In order to achieve the unprecedented ultra-low luminance measurement, the optical system and the electric system are newly designed and we succeed in removing the optical and electric noise thoroughly.

OPTONEXUS CO., Ltd. is proud of a domestic high share by the glass polish of the glasses lens. In the cerium oxide-related abrasives used for polish contain the rare-earth element which the resource dryness is concerned about. Therefore, at the OPTONEXUS Takine factory to which I belong, we push forward a study about effective use (reuse) of waste abrasives by industrial-government-academic cooperation including Fukushima Prefecture.

In fiscal 2008, first of all, we verified about the degradation (the quantity of lens polish before polish capability falls) by the use of unused abrasives as comparison material. After fiscal 2009, we will also inspect reproduction abrasives and grasp degradation. We will, not only use it in the production site, but aim at the resource saving in the entire industry by offering our data.

* FPD (Flat-panel display) of the contrast ratio 1 million:1

Finetech Business Unit
Person in charge of Optical Instrument Design group

Person in charge of OPTONEXUS Co., Ltd. (Domestic subsidiary company)
TOPCON offered various supports with all over the group for the revival from the big earthquake that hit People’s Republic of China Sichuan in May, 2008.

- **Donation of products to the China Earthquake Administration and the State Bureau of Surveying and Mapping**
  - For data collection of aftershock and monitoring of crustal movements, five sets of high precision GNSS receivers*1 and technical support were provided to the China Earthquake Administration. (TOPCON H.Q.)
  - GNSS equipments were also provided to the State of Bureau of Surveying and Mapping for reconstruction of reference points*2 in the seriously damaged area. (TOPCON H.Q. Topcon Positioning Systems, Inc. (A group company in U.S.))

*1 An instrument that receives radio signals from the positioning satellites to determine its location.
*2 Reference point is a marker that indicates its location on earth and the position above the sea level. Without recovery of the points, precise surveying compared with the maps cannot be done and it causes a delay in reconstruction.

Sokkia Surveying Instruments Trading (Shanghai) Co., Ltd. (a group company in China) also offered surveying instruments and sent staff for restoration of reference points in Pingwu district.

- **Donation activities**
  - The TOPCON GROUP made donations for earthquake victims. The following pictures show a part of the donation activities that done by volunteer employees of group companies in China.

TOPCON GROUP is contributing to the health of eyes in various countries and regions.

- **Support for an ophthalmology medical examination program**
  - Topcon South Asia Pte. Ltd. supported a free ophthalmic examination program for Singaporean people provided several times a year in domestic various areas, sponsored by the Singapore National Eye Center, and supported a free ophthalmic diagnostic program “Eyes Care Day” lead by Ministry of Health Singapore, and donated eye examination instruments. (Topcon South Asia Pte. Ltd. (A group company in Singapore))

- **Support for the eye examination**
  - Topcon Medical Systems, Inc. supports every year the eye examination and free glasses activities for the underprivileged children “GIVE THE GIFT OF SIGHT” held by glasses chain store group Luxottica, and dispatches the staff. (Topcon Medical Systems, Inc. (A group company in U.S.))

- **Support for the medical system construction**
  - TOPCON donated a fundus camera that was eye examination equipment to People’s Hospital newly established in Dongguan City, Guangdong Province, China.
TOPCON performed the followings as activities for the local people who were important stakeholders. Here, the examples are introduced.

As the other actions, SOKKIA TOPCON participated in “Zero garbage action in Ashigara” and “Sakawa River unification beautification campaign” which were the cleanup activities in surrounding areas of business places.

Support for scholarly investigation

- In Graduate School of Medicine, Osaka University, TOPCON has established the contribution course “Visual information control study”, and various results such as development of the medical Wave Front Analyzer which became the first domestic production etc. have been achieved. (Since 2004)
- TOPCON also cooperated with the establishment of “Traceability instrumentation engineer contribution course” in the School of Engineering, The University of Tokyo for supporting the education and research activities. (Since 2008)

With everybody in the local area

CSR and Labor Union

Now, the labor union becomes the organization that needs to participate in the whole activities of CSR in the company. The minimum labor standards that should be protected for workers are one of the main fields of CSR. Because the union member (employee) is an important stakeholder for a company and at the same time, he works on CSR with a company, the labor union is regarded as the existence incorporated in CSR. If CSR widely pursues the profit of the whole society, the labor union’s participating in CSR becomes an important tool that materializes the philosophy the labor union aims at. I am convinced that securing union member’s (employee) employment stability, proper wages, working conditions, and healthy workplace environment with protecting various stakeholders' profits will lead to sustainable development of a company.

All the electric power used in the event was covered by green electricity. (TOPCON)
TOPCON’s Business Conduct Guidelines state as follows: TOPCON will have communication widely with society and disclose the correct corporate information appropriately. Besides disclosing information based on the related laws and regulations and the rules established by stock exchanges, the company is also making efforts to disclose any information related to its stakeholders rapidly and fairly.

Specific Standards of Conduct

① TOPCON will disclose the corporate information appropriately and on a timely basis in conformity with the relevant laws and regulations.
② TOPCON will perform publicity activities sincerely toward mass media and securities analysts by clarifying the target and arranging the information and the data to be disclosed, based on the objective facts.

Respect for Customers

● Basic Policy
TOPCON will aim to contribute to the society through providing safe and useful Products and services that satisfy the diversified customer needs.

● Universal Design
TOPCON puts an emphasis on universal design as a guiding principle for developing products. We strive to provide broad-spectrum solutions that help everyone.

An example of our effort (KR-1W)

① Five measurements (refractive measurement, kerato measurement, cornea shape measurement, Wave Front aberration measurement, pupil diameter measurement) required for ophthalmic diagnoses are now combined in one single unit.
② Although it has various functions, a series of operation can be performed with one button so that the measurement may be possible for a short time in easy operation.
③ The screen design which an operator can operate without confusion, by the adoptions such as a simple screen design, guide messages, and intuitually imaginable icons. TOPCON will challenge the improvement of the further convenience so that all customers who use our products are satisfied.

Together with Suppliers

TOPCON strives to assure open and fair procurement practices based on green procurement. Besides, TOPCON is working to comply with the RoHS directive and other environmental regulations around the world. We also hold annual briefing meetings to get our business policy better understood by our customers. In fiscal 2008, approximately 90 companies were represented by 150 people in the briefing.

Procurement activities

① TOPCON will observe the laws and regulations related to procurement activities and procure the necessary materials (including services) at the appropriate quality, price and delivery period under a fair commercial relationship.
② TOPCON will promote green procurement for the manufacture of the Products harmonized with the environment.
Responsibilities to Employees

Respect for Human being

Based on a philosophy among the management policies, “TOPCON strives to create an environment enabling its employees to demonstrate their independent creativity to the full.”, TOPCON is making efforts to build personnel measures fairly for the treatment etc of its employees in accordance with their “willingness, performances, challenge wills”. Our activity of coping with employees’ needs to “work and continue working” consists of building a variety of job support systems for employees. We also create an environment for Persons with Disabilities enabling them to demonstrate their abilities to the full. We select their workplaces, build a slope way, consider their commutation methods.

Basic Policy of Respect for Human being

1. TOPCON will accept different values and respect the personality and character from the standpoint of respect of human dignity, and give Employees etc. the opportunity for self-realization and cultivate their capability to the full.

2. TOPCON will fully comply with the laws and regulations and respect basic human rights, and will not make any discriminatory treatment. TOPCON will never engage in child labor or forced labor.

3. TOPCON will develop an environment where Employees etc. may perform their duties creatively and efficiently and so that Employees may achieve the “work-life balance” (ideal balance between work and home).

Basic Policy of Health and Safety

TOPCON established “TOPCON GROUPS Safety and Health Policy” in order to secure employees’ safety and health which is one of the most important management’s responsibilities. TOPCON sent it out to domestic and overseas subsidiaries. TOPCON also issued “Guidelines for Measures on Smoking” in the workplace. According to it, responsible officials at home and abroad should take measures on smoking.

TOPCON GROUP’S Basic Policy for Environmental Protection

Recognizing that “It is the basic responsibility of human beings at present to hand down our ‘One Precious Earth’ to succeeding generations with its environment in sound state”, TOPCON wishes to promote environmental protection activities as far as technically and economically possible and has established its own basic policy for environmental protection as follows.

1. Topcon Group pursues and promotes environmental protection in accordance with its environmental policy and considers environmental protection to be one of management’s primary responsibilities.

2. Topcon Group, as part of its environmental management, complies with its own voluntary environmental standard as well as laws and regulations related to environmental protection.

3. Topcon Group assesses the environmental impact of its business activities, products and services. In doing this, the Topcon Group specifies its objectives, targets to eliminate the negative impacts and to improve the positive environmental aspects, and promotes its Environmental Report.

4. Topcon Group has set up an organization to promote activities related to environmental protection. The activities include, development of Environmentally Conscious Products (ECPs), reduction of hazardous chemical substances, reduction of waste, and increase in energy savings.

5. Topcon Group contributes to society through its environmental protection activities by partnering with local communities.

6. Topcon Group strives to enhance awareness of the environment through educational and PR activities concerning environmental protection.

7. Topcon operates globally, and accordingly, promotes environmental activities throughout the Topcon Group.

(Additional Information to Environmental Report)
Prevention of Global Warming

The amount of CO2 emission in fiscal 2008 was less than last year’s result. However, emission per unit of sales was affected by the worldwide economic depression and unattainable for the target. In order to fulfill CO2 emission reduction obligation by Tokyo municipal ordinance, TOPCON will take the Emission Trading System into consideration as a new method and aim at accomplishment of a goal together with the voluntary plan.

Efficient Use of Resources

In fiscal 2008, the total amount of waste generation was below the last year’s result. However, emission per unit of sales was unattainable for the target as well. The calculation method does not suit the present condition by the increase of trade-in products. In fiscal 2009, TOPCON will review the method and aim at the achievement of the voluntary plan.

Voluntary Environmental Plan 2010

Voluntary Plan:

Plan for the company’s commitment to voluntary activities

The TOPCON GROUP, mainly its affiliated companies engaged in domestic production, has formulated and implemented a Voluntary Plan covering the period from FY 2006 to the end of FY 2010.

The names of the companies targeting the Voluntary Plan are listed here.

Reduction of CO2 Emissions Due to Business Activities

Reduction of Chemical Substance

Emission of Volatile Organic Compounds

Reduction of Waste Caused by Business Activities

Zero Emission Achievement by the TOPCON GROUP

Topcon Yamagata achieved Zero Emission in April 2009. The way to the achievement was not smooth at all. We are introducing the activities that the person in charge tackled.

1. Secretariat made some garbage cans for easy separation.
2. We performed the enlightenment movement to the separation thoroughness to each one with the slogan “The most important thing for Zero Emission is separation”
3. We promoted 5S (housekeeping, workplace organization, cleanup, keep cleanliness, and discipline) by all employees’ participation.
4. We investigated waste recyclers, negotiated, selected and concluded a contract.
5. We visited the recycler to confirm if the recycler was disposing of the waste properly.
6. We confirmed if the items of the waste are consistent with the contents of contract.

Zero Emission was not able to be achieved by only secretariat without cooperation of a lot of people like employees, waste recycler and suppliers.

Way to Topcon Yamagata’s Zero Emission Achievement
Environmental Report

Environmental Burdens Caused by TOPCON

Results of FY 2008

Major environmental burdens caused by TOPCON’s business activities such as product development, procurement and production include energy consumption, the use of water resource and chemical substances, CO2 and exhaust gas emissions, drainage to sewers, and waste disposals. In this section, these environmental burdens occur and working out countermeasures to minimize them. The total amount of CO2 due to overall energy consumption was 4,921 tons. The atmospheric emission of chemical substances (7 items based on Tokyo Metropolitan Environmental Security Ordinance) was 1,290 kg.

Topcon endeavors to manufacture good and eco-friendly products by understanding where environmental burdens occur and working out countermeasures to minimize them. The total amount of CO2 due to overall energy consumption was 4,921 tons. The atmospheric emission of chemical substances (7 items based on Tokyo Metropolitan Environmental Security Ordinance) was 1,290 kg.

Other Environmental Information

Place of business defined by the City Planning Law
Name of district: Light-industrial district
Lot area: 23,499m2
Regulations on specified plants: None (Tokyo Metropolitan Environmental Security Ordinance)
Water drainage: Sewage
Acquisition of ISO14001: September 29, 1997
Approval Organization: JACO
Lead office and division name: Administration & CSR Dept.
Persons responsible for environmental protection: 5 full time employees

Results of Environmental Training

Capacity | Contents | Attendees
--- | --- | ---
General employees | Raises awareness for the environment and improves the levels of environmental protection activities | 1,139
Senior Managers Managers | Environment management, ISO 14001, trend in environmental legislation, etc. | 288
Significant machine operators | Operation, control, environmental impacts and emergency measures for specific facilities | 25
New employees | Global environmental problems, domestic and overseas legislation, ISO 14001, environment policy, etc. | 31
By occupational qualification | Usage of the Industrial Waste Control form, latest trend on environmental legislation related to products | 75
Internal Auditors | ISO 14001, ISO surveillance results, trend in environmental legislation | 16

Total | | 1,574
In the third party opinion of 2008 version, I highly appreciated that quantitative information was described in many items for the first time, and at the same time I asked TOPCON to open the door of information disclosure certainly even little by little. At the beginning of this year, I heard that 2009 version would decrease 12 pages compared with that of last year and was very anxious about the retreat of information disclosure. However, such an anxiety ended in imaginary fears when I read 2009 versions. About the information that stakeholders wanted to know, the information disclosure has progressed rather than retreated. When an example is given, they are so-called PDCA list of CSR, establishment of BCP, education regarding export control and the results of audit on group companies, CSR and Labor Union and amount of global waste. Especially, the description of PDCA list of CSR and amount of global waste are appreciated as an important step for a future action and substantial report. Moreover, the decrease of the pages is covered by utilizing a Website more positively and inserting supplementary information, details and numerical values. However, at the time of the demand for the information disclosure from stakeholders rises, it is difficult to describe the triple bottom line only in 18 pages even though they are only the main items. Under the present conditions, I expect the increase of pages of the booklet. On the other hand, there are the choices such as specializing in Website, making the booklet a direction board to Website and focusing on the materiality (importance), or integration with an annual report. As for all, lively communication with stakeholder is a purpose. To that end, establishing mid-term communications strategy and practicing it steadily might be effective.

Another feature of 2009 version is that it clarifies the definition and the concept. The typical example is that it defines CSR activities as “Practicing Management Philosophy, Management Policy and Business Conduct Guidelines globally”, and established CSR basic policy. Since CSR of TOPCON became clear by this, I expect that the progress based on this definition is reported every year. The question is how much such guidelines filter into employees and how much it is reflected in daily activities. In order to verify them, I would like TOPCON to conduct an opinion survey and to let us know the result of the evaluation and its subsequent measure etc.

Thus, the CSR report has been improved steadily in this way, however, from the viewpoint of the summit in our country, I cannot but say, “Much more efforts are required.” The first improvement for that is an examination of the content. How your company managed the report and what kind of performance you reached. Self-evaluation to the process and the performance, and a measure for the next fiscal year should become the main contents. However, the CSR report devoted space to the policy, the system and code of conduct, and the above-mentioned contents are few or finished with statement of several lines. Even if pages are the same, I think that it could be improved by shifting the policy and the system to Website. There are some other things that I would like TOPCON to make efforts, however, the most essential thing for you is to reconfirm the significance and merit to disclose non-financial information positively.

In Response to Third-Party Opinion

On the TOPCON GROUP CSR report that became the 4th issue, Mr. Yamaguchi made comments that are to the point from various viewpoints. To be honest with you, although we worked on a new content such as PDCA list of CSR, we cannot deny the lack of important statements about “What kind of management we did and what kind of performance we reached”. We have made progress of sharing the philosophy and the sense of values such as “What is CSR for TOPCON GROUP?” during this year. As a next subject, we will repeat concrete practices and the results will be reflected in an intelligible form for this report. Although trial and error continues still more, it would be greatly appreciated if the opinion and the proposal without the reserve can be obtained.

TOPCON CSR Committee
Chairman
Hiromasa Miyawaki
