Agriculture

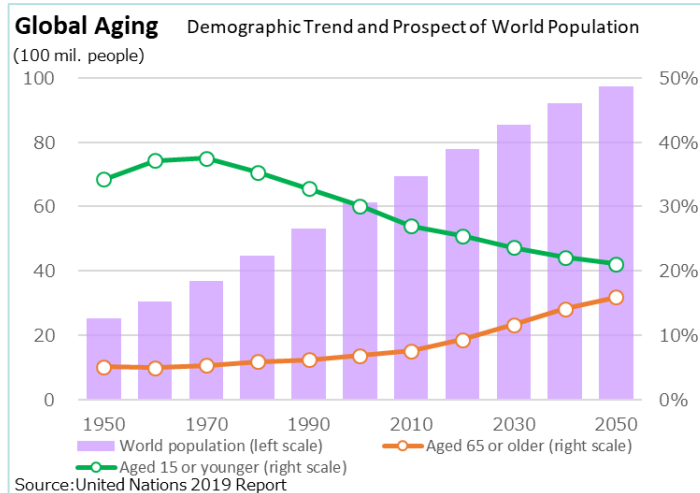

IT Agriculture

Societal challenges to be addressed by Topcon

Increase in eye disease resulting from global population aging

Global shortage of ophthalmologists

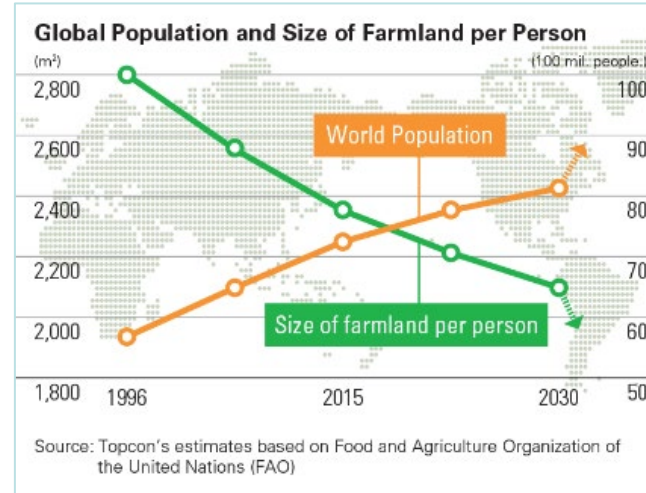

Increasing Eye Diseases

Food shortages resulting from global population growth

Decrease in crop production and damage caused by global warming and extreme weather events

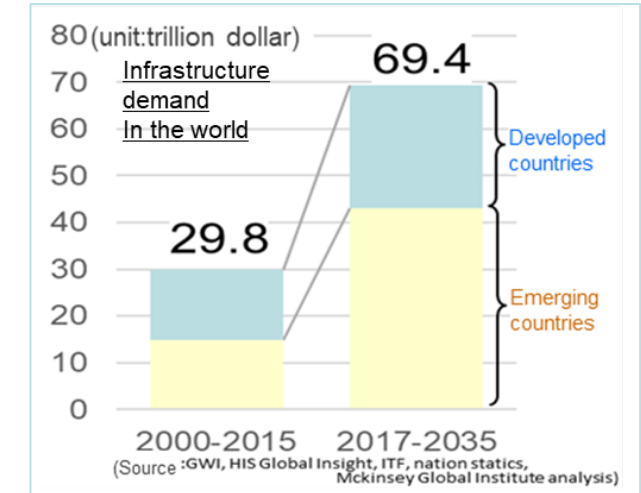

Food Shortages

Shortage of skilled engineers resulting from globally rising infrastructure

Intensifying and frequent disasters associated with climate change

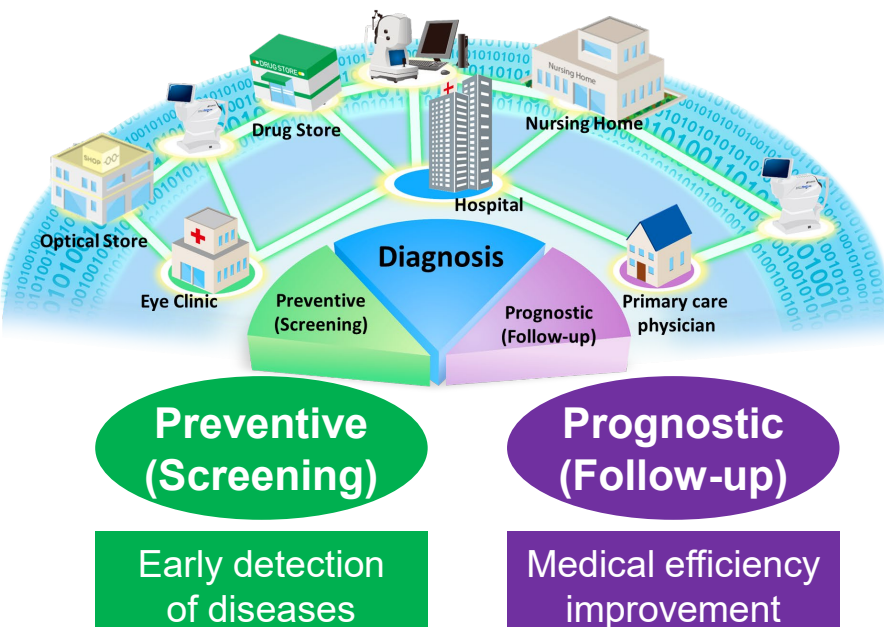

Shortage of Engineers

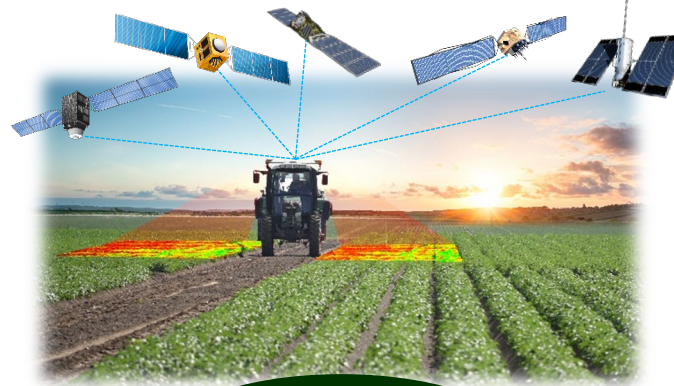

Topcon's solution for the existing societal challenges

Eye Disease Screening (IoT network)

Automation of farm operations (IT Agriculture)

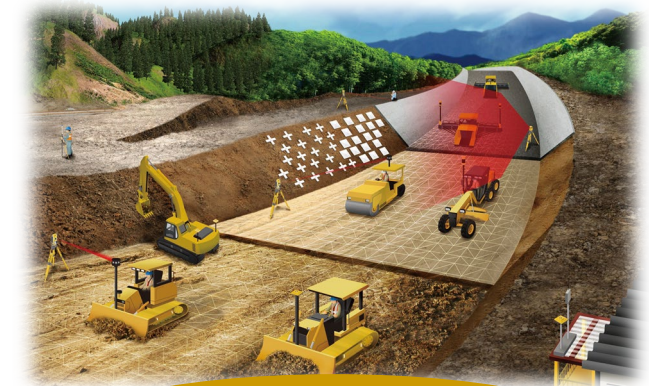

High precision
/Labor saving

Production/Quality
improvement

Automation of Construction process (IT Construction)

High-precision/Solution
to labor shortage

Production/Quality
improvement

Although Healthcare, Agriculture and Infrastructure are **major industries**, they are **way behind in automating the process and adopting IT**
